FRAME DESIGN

Engineered for real-world performance, especially on challenging roads and long days in the saddle. The Advanced-grade composite frame features endurance geometry with the perfect blend of light weight, stiffness and road-smoothing compliance. The OverDrive 2 steerer tube and composite fork work together to boost front-end stiffness and precision. Disc brake technology with 12mm front and rear thru-axles gives you total control, even on rough roads and poor conditions. The D-Fuse seatpost smoothes out road vibrations and the PowerCore bottom bracket turns every pedal stroke into positive forward motion.

*Seat angle is actual
 **Toptube is measured from the centre of the headtube horizontally back to the top of the effective extension of the seattube
 ***Standover height is based on the largest size tyre that will fit the bike, not necessarily the included size tyre
